conve-ult Comprehensive Test Document

This is an automated demonstration of conve-ult, a universal file converter powered by Java, Apache POI, and Apache PDFBox.

Key Features

- Any Image to Any Format: PNG, JPEG, WEBP, GIF, BMP, TIFF, PDF
- Any Document to Any Format: PDF, DOCX, DOC, ODT, HTML, Markdown, Plain Text
- High Performance: Native JVM execution with zero heavy office daemon overhead
- Precise Formatting: Support for bold, italic, code blocks, lists, and tables

Sample Table Data

Component	Technology	Version	Purpose
Apache POI	Java Library	5.2.5	Word (.docx/.doc) document processing
Apache PDFBox	Java Library	3.0.1	PDF rendering, layout, and extraction
TwelveMonkeys	ImageIO Plugin	3.10.1	WebP, TIFF, and advanced image formats
CLI Architecture	Java Standard	Java 25	Fast, self-contained CLI tool

Code Snippet Example

```
public class ConveUltDemo { public static void main(String[] args) { System.out.println("Universal file conversion made effortless!"); } }
```
